

Gustavo Lemes

Software engineer | gustavolemesleite@gmail.com | gustavo-lemes-dev-portfolio.netlify.app | github.com/gustavolemesleitebarbosa

For over 5 years, I have been developing applications both as personal projects and professionally. I am experienced in both mobile and web development and have knowledge and experience in the entirety of the development cycle, from project start to deployment.

Work Experience

Pocketlab – Remote Jun 2023 – Nov 2024

- Software engineer
- Developed new features for the web notebook app to improve user experience and functionality.
 - Integrated the software interface with the company’s hardware products.
 - Bridged the gap between digital tools and physical devices.

Profusion – Remote Apr 2021 - Dec 2022

- Software engineer
- Built complex interfaces, streaming features, and real-time updates with WebSockets for a sports app targeting the US market.
 - Worked on IoT and hardware-integrated apps with Google Analytics, REST, and GraphQL APIs.
 - Designed advanced, user-focused interfaces for seamless integration and functionality.

Griaule Biometrics – São Paulo, Brazil Aug 2020 – Mar 2021

- Software engineer
- Developed core fingerprint detection and extraction tools for the company’s biometric suite.
 - Built these tools from scratch as part of the biometric software development team.
 - Contributed to the overall development of the company’s biometric suite.

OneBrain – São Paulo, Brazil Feb 2019 – Apr 2020

- Software engineer
- Worked on diverse projects in industries like automotive, food, and retail.
 - Contributed to a disruptive audio processing venture as a mobile software engineer.
 - Collaborated with a skilled team to deliver innovative solutions. for several different apps and websites.

Education & Learning

UNICAMP (State University of Campinas) – São Paulo, Brazil 2009 - 2015

- Bachelor Degreein Mechatronics Engineering
- Gained a strong foundation in mechatronics, combining mechanical, electrical, and software engineering.
 - Worked on projects integrating robotics, automation, and control systems.

UNICAMP (State University of Campinas) – São Paulo, Brazil 2017 - 2019

- Master of Science in Mechanical Engineering , GPA: 3.8/4.00
- Specialized in mechanical computational engineering with a focus on optimization algorithms.
 - Developed a Python algorithm for optimal team allocation in globally distributed Scrum environments as main goal of my thesis.

Skill & Achivements

- **Hard Skills** : React. ReactQuery, Redux, Tailwind-Css, Styled-components, Sass, NextJs, GraphQL, T3stack, React native, Xamarin, Android (both with views and Jetpack compose), HTML, CSS, Git, Github, NodeJs, Prisma ORM, TypeORM, Typescript, Javascript, Java, Kotlin, Sanity headless CMS, Vercel, Netlify.
- **Soft Skills** : Strong advised, Coordinate skills, Capable of adapting to any environments, creative and efficient individual, Team player and detail oriented.
- **Certifications** (2023) : Rocketseat Mobile BootCamp
- **Certification** (2020) : Rocketseat Fullstack BootCamp
- **Languages** Portuguese (fluent), English (fluent), French (Intermediate), Spanish (Intermediate).
