

Gustavo Lemes

Software engineer

For over 5 years, I have been developing applications both as personal projects and professionally. I am experienced in both mobile and web development and have knowledge and experience in the entirety of the development cycle, from project start to deployment.

Work experience

Software engineer

Pocketlab, Jun 2023 - Nov 2024

During my time at PocketLab, I contributed to developing new features for the web notebook application, enhancing user experience and functionality. I worked on integrating the software interface with the company's hardware products, bridging the gap between digital tools and devices.

Software engineer

Profusion, Apr 2021 - Nov 2022

During my time at Profusion, I worked as software engineer on a big sports application targeted towards the American and European markets. My responsibilities included implementing interfaces, streaming features, and real-time updates using websockets. In addition to this, I also worked on other applications that incorporated features like IoT, hardware integration, and integrations with Google Analytics, REST, and GraphQL APIs. My role also involved developing complex interfaces

Software engineer

Griaule Biometrics, Aug 2020 - Mar 2021

At Griaule Biometrics, I worked as a software developer, focusing on the development of the company's biometric suite. My main areas of responsibility were the fingerprint detection and fingerprint extraction tools, which I helped to develop from scratch.

Software engineer

OneBrain, Feb 2019 - Apr 2020

During my time at Onebrain, I had the opportunity to work on diverse and exciting projects across different industries, such as automotive, food, and retail. One of the most challenging projects was a disruptive venture focused on complex audio processing. As a mobile software engineer, I collaborated closely with a team of talented developers and engineers to deliver innovative solutions.

Intern

Affinity Petcare, Jun 2015 - Jun 2016

As an intern at Affinity Pet Care, I had the opportunity to participate in a job rotation program that provided me with a comprehensive understanding of the company's operations. Throughout the rotation, I worked alongside experienced professionals in different departments.

Education & Learning

Rocketseat Fullstack BootCamps

rocketseat.com.br, Aug 2020

rocketseat.com.br, Feb 2023

Master of Science in Mechanical Engineering

UNICAMP (State University of Campinas), 2019

Academic Interchange

Czech Technical University end at Mar 2014

Bachelor in Mechatronics Engineering

UNICAMP (State University of Campinas), 2016

Skills

Experienced with: React, ReactQuery, Redux, Tailwind-Css, Styled-components, Sass, NextJs, GraphQL, T3stack, React native, Xamarin, Android (both with views and Jetpack compose), HTML, CSS, Git, Github, NodeJs, Prisma ORM, TypeORM, Typescript, Javascript, Java, Kotlin, Sanity headless CMS, Vercel, Netlify.
